

**CIIFROL CORROBAN 115****Description**

Ciifrol Corroban RPO 115 Specially designed oil base product with very good salt spray & penetration properties. It displaces water and give very good protection. Ciifrol Corroban 115 oils are soft film water displacing type, rust & corrosion preventives. These fluids can be applied directly to water wet metal surfaces, where they displace water, leaving a protective film. All these fluids have excellent spreadability and they can be applied either by dipping or by spraying. The protective films of all these grades can be removed by wiping off with rags/waste soaked in kerosene/mineral turpentine or by alkaline/solvent degreasers. These oil give rust protection upto 4 months and 1 month in outdoor and indoor conditions respectively.

**Application**

Ciifrol Corroban 115 leaves a greasy film, resistant to handling and gives excellent protection. It can be used for protection against Rust during storage of valuable machine tools and can also be used as a final protective coating under severe conditions. The application can easily be done by spray or brush. For deeper penetration and better dewatering effect, dipping is the recommended method. The component after complete soaking of oil should be allowed to drain excess oil for proper film formation.

**Product Benefits**

- Provides best in class rust protection.
- Minimum carries over.
- Optimum film thickness to provide best coverage resulting in savings for customers.
- Minimum evaporation loss in its class.
- Excellent dewatering properties.

**Physical Properties / Specifications**

Property	Method	Value
Kinematic Viscosity @ 40 Deg C cSt	IP	15.09
Flash Point Deg C (COC)	IP	160
Coverage, sq m/ lit	Typical	150-165
Film Thickness	Typical	2-3 Micron
Salt Spray Hrs	B 117	50
Water displacement test	M-139	Passes
